

Engineering & Maintenance Solutions for the Quarrying Industry

MS Fabrications QLD Pty Ltd provides specialised engineering and maintenance services specifically for the Australian quarrying sector. We understand that in a high-impact environment, equipment reliability is the backbone of production. Our team combines expert steel and aluminum fabrication with heavy-duty mechanical maintenance to minimize downtime and extend the service life of your plant.

Custom Fabrication & Structural Solutions

Our workshop delivers precision fabrication for heavy industrial and quarry applications, built to handle high-load, high-wear environments.

Installation & Site Fit-Out

- Shutdown change-outs and plant upgrades
- Alignment, fitment and commissioning support
- Maintenance-friendly design for safer future access

Machinery & Component Repairs

- Crack detection, gouging and coded weld repairs
- Line boring coordination & fitment works
- Refurbishment of plant components to OEM or improved design

Structural Steel Fabrication

- Heavy-duty frames, support structures & equipment bases
- Modular plant sections for fast site installation
- Skid-mounted systems for mobile and fixed plant

Wear Management Solutions

- Fabrication of Hardox, Bisalloy & chromium carbide plate components
- Replaceable wear packages for high-impact zones
- Bucket, chute and transfer point rebuilds

Pipework & Materials Handling

- Slurry, water and air service pipe fabrication
- HDPE to steel transition spools
- Custom launders, transfer chutes & deflectors

Plant & Infrastructure Fabrication

Chute & Hopper Refurbishment

- Custom wear liners – Hardox, ceramic & rubber

Conveyor Systems

- Structural repairs & pulley replacements
- Custom guarding to Australian Standards

Safety Access Solutions

- AS-compliant walkways, platforms & handrails
- Safer maintenance access to crushers & screens

The MS Fabrications Advantage

- ✓ Rapid response for breakdowns & shutdown works
- ✓ Durable, wear-resistant materials for abrasive environments
- ✓ Site-ready crews for workshop fabrication & on-site installation
- ✓ Reduced lead times to keep production on track

Specialised Quarry Maintenance

Crusher Liner Change-outs

- Mantle & Concave replacement for cone crushers
- Jaw die & side plate change-outs for primary crushers
- Crusher backing compound inspection & application
- Blow bar and wear plate rotations for impactors

Screen Media & Mat Replacement

- Rapid change-outs – wire mesh, polyurethane & rubber media
- Clamp rails, tensioning systems & channel rubber replacement
- Structural repairs to screen boxes, sub-frames & support springs
